DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a method for forming an air bearing surface on a slider, classified in class 29, subclass 603.16.
 - II. Claims 16-20, drawn to a method for forming a slider, classified in class 29, subclass 603.12.
 - III. Claims 21-29, drawn to a method for processing a slider, classified in class 29, subclass 603.08.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as a silicon slider body and invention Group II has separate utility such as a read/write head on the silicon body and invention Group III has separate utility such as precursor materials. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3729

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
